## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 3, 5 and 7 are rejected under 35 U.S.C. 102(a) as being anticipated by Mayersky et al (USPN 6,487,860).

Mayersky et al disclose a single piece attachment leg (76) for a gas turbine fuel ring (60) in Fig. 4. The leg has a substantially first flat portion (near the nut of bolt 88) and a substantially flat second leg portion (the part of the element closer to the bolt head), there is a transition portion (the c-shaped part) between the flat portions. The transition portion is closer to the first end of the attachment leg such that the second leg portion is longer.

### ***Allowable Subject Matter***

Claims 2, 4, and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 8-19 are allowed.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Spears Jr., Hansel et al and Sharifi et al disclose fuel supply tubes connected to fuel rings.
